ADVENTURE WORKS

Adventure works is a retail store which sells bicycles and other fitness/exercise items. You are required to do a quick presentation on their shipping and sales data.

1. What are the top cities they ship to and the sales per city
2. Who are the top customers they sell to.
3. Who are their top sales agents

You can connect to their database on Azure. The manager has given you the following credentials
- Server: sqlservercentralpublic.database.windows.net
- Database: AdventureWorks
- User: sqlfamily
- Password: sqlf@m1ly

If this is the first time connecting to Azure on Tableau, make sure you download the driver
https://www.tableau.com/support/drivers (Choose Azure Synapse Analytics). If you cannot connect to Azure, I have provided the csv extracts of the data.
